

Location: Leiden
Education level: BSc
Working hours: Full-time (32 hours possible)
Target start date: As soon as possible

About Amarna Therapeutics:

Amarna Therapeutics, founded in 2008, is a Biotech company headquartered in Leiden, with R&D facilities in the Netherlands and Spain. We developed the SVec viral gene delivery vector platform, the key to the success of the next stage gene and immunotherapies for treating today's major diseases.

In order to further strengthen our assay development group in our Leiden R&D facility, we are currently looking for a:

Associate Scientist Assay Development (f/m)

Job Description:

We are looking for a motivated individual who enjoys working in a multidisciplinary team. In your role as Associate Scientist AD you will be responsible for planning, performing and reporting experiments to support the process development team and for the development of novel in process and release assays. You will be working under the supervision of a principle scientist in a small-team in a highly dynamic company.

Qualifications:

- BSc in Life Sciences with more than two years of relevant work experience in the industry.
- Hands-on experience with qPCR, RT-qPCR, ELISA and Western Blot analysis.
- Hands-on experience with mammalian cell culturing and viral vectors are preferred.

Competencies:

- Highly accurate in practical and data analysis work
- Highly motivated
- Strong team spirit and flexible mindset
- Proactive and display ownership
- Written and oral communication skills in English (Dutch is an advantage)

Our offer:

Amarna Therapeutics offers a pleasant and positive working environment. The job will be full-time (32 hours possible). If you want to be part of a dynamic start-up biotechnology company to develop the next generation of gene and immunotherapies, then send your application (resume and motivation letter) to: careers@amarnatherapeutics.com
